Subject: Dimock Water

Hi Trish and Dave,

I am one of the people who met with the EPA last month in Philadelphia. Today Energy In Depth published this letter (below) to prove that Dimock has no problems with their water. Is this letter real and if so what did the EPA test for? Are the results available to the public?

As you know the families in Dimock have stopped having any water delivered to them. They are not drinking their water. People want to help them but the EPA's letter will be devastating to them. Person to person, would you drink the water from the families wells in Dimock, the well's EPA tested?

Sincerely,

**Ex. 6 - Personal Privacy**

Montrose, PA

Dear Dimock Residents,

This email is a follow-up to the visits to Dimock area homes by EPA on November 10, 2011 and the subsequent review of well sampling data for wells impacted by the Cabot Oil and Gas Company drilling activities. EPA has conducted a preliminary review and screening of the data provided by the Pennsylvania Department of Environmental Protection and residents. While we are continuing our review, to date, the data does not indicate that the well water presents an immediate health threat to users. EPA will continue to review available information related to the concerns of Dimock area residents. We are continuing to work with the Commonwealth of Pennsylvania going forward on this issue.

Please feel free to call me or David Polish, Community Involvement Coordinator, at (215) 814-3327, if you have further questions.

Sincerely,

Trish Taylor, Community Involvement Coordinator
